

# MINDSYSTEMS AMODE<sup>®</sup>

## Version 2

The smart all-in-one information management solution  
Info Management | Visual ThoughtMaps | Project Plans

## Release Notes:

### Mindsystems Amode V2: Build 3368

**Release Date: 22nd April 2010**

#### Bug Fixes:

- Export hyperlinks to MindManager unstable for some MindManager Versions.
- Email field in Email Alarm Setup cannot handle capital letters.

#### Enhancements:

- Add settings memory to Calendar Tab. When various options like timescale are changed, these settings are now remembered between sessions.
- Ruler margin in Notes (alters page size if words are not wrapping) is now remembered when creating a new topic. The limitation is that you must create new topic and immediately type for margin size to carry over into new topic.
- Add option in Application Prefs to left align child branches with parent during Gantt print to save space on print outs.
